## The Defense of Darwin

The Northern Territory, and Darwin in particular, played a significant role in Australia's defensive and offensive activities during World War II. East Point has a long association with Australian military history. From as early as 1925, military tacticians identified it as an ideal defensive position for protecting Darwin Harbour and its strategic assets. East Point subsequently became one of the most heavily militarized areas in Darwin. During the war, Darwin was bombed 64 times over almost two years.

Venture today to the **Darwin Military Museum** for some **free time** to view the artifacts of war, including artillery pieces, vehicles and firearms. The exhibition space includes the *Bombing of*

*Darwin Experience* -- a major interpretive theatre production that offers visitors a sense of what it must have been like to have witnessed the first bombing of Darwin in 1942.

Visit **Charles Darwin National Park** on the outskirts of the city, at Frances Bay. It is both a significant **wetland area** and part of a network of World War II military sites established during the development of Darwin as Australia's northern defence line. The park is home to a number of bunkers and shelters that were used for storage between 1944 and the mid-1980s. Take a stroll along the parks pathways, approximately 500 yards, to the scenic lookout platform for views of the harbour and its surrounding wetland. Along the way, you'll view the bunkers and shelters and hear about their history and use.
