

## Ports & Excursions

### Barbados

Barbados is one of the few Caribbean islands solely colonized by one nation. It's no wonder Bajans describe their country as being "more English than England sheself," surnames like Worthing and Hastings abound. But look around and you know you're not in England: rich and fertile tropical fields meet a glistening, azure sea. The soft pastels of old chattel houses blend with the vibrant reds, oranges, and greens of roadside fruit stands. In short, Barbados exudes a charm all its own. Perhaps it is due to Bajan culture, that celebrated blend of English tradition and the African heritage brought to the island by slaves imported to work the sugar plantations. The potent brew which results flavors every aspect of island life, from music, dance and art, to religion, language and food.
